#1 LightForce™ 3D Braces Provider in Australia*

L&L ORTHODONTICS

Your LightForce™ 3D Braces Guide

LIGHTFORCE

Braces, But Better

Faster Treatment, Fewer Appointments

*Based on the number of patients treated since September 2022.

What are LightForce™ 3D Braces?

Forget one-size-fits-all. **LightForce™ is the world's first fully custom, 3D-printed braces system**, designed to be unique *just for you, and to* ***fit your teeth only***.

Suitable for adults and teens with crowding, spacing, overbites and more, LightForce™ can help make your treatment smoother, smarter, and more discreet.

Our Specialist Orthodontist can customise the size, shape, and placement of each and every bracket, giving them more control over every aspect of your treatment.

These are braces, but better.

Introducing LightBracket Metal™

L&L Orthodontics is proud to be among the first providers in Australia to offer LightBracket Metal™ - the world's first patient-specific, 3D-printed metal braces system.

Each bracket is generated directly from your treatment plan, designed by our Specialist Orthodontists and custom-made for your individual teeth.

LightForce brackets conform precisely to your teeth, reducing discomfort and promoting accurate straightening.

No two brackets are the same, because no two smiles are the same.

What makes LightForce™ 3D Braces different?

Why Personalisation Matters

LightForce™ 3D Braces

- 3D printed
- Personalised to each patient
- Digitally designed
- Typically shorter treatment times

Traditional Metal Braces

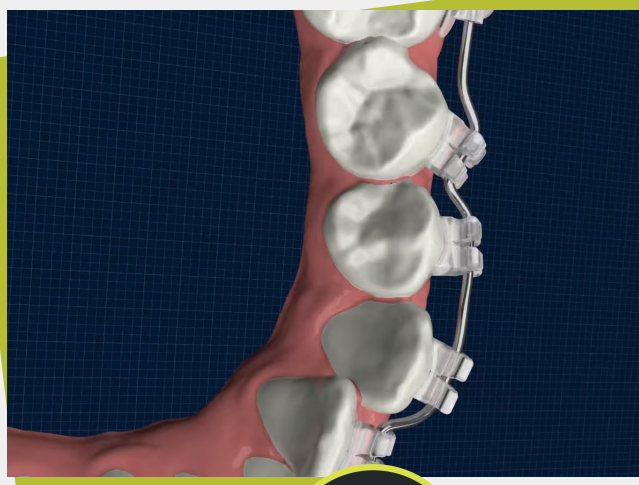

- Can be bulkier and less aesthetic
- Standard brackets for each tooth and patient
- Typically longer treatment time

Over 2,000 patients with LightForce™ 3D Braces

As leaders in orthodontic technology, L&L Orthodontics was the first practice in Australia to offer LightForce™ 3D Braces and has since treated over 2,000 teen and adult patients.

Benefits of LightForce™ 3D Braces:

- Fully customised to your teeth
- Potentially faster treatment times
- Fewer appointments
- More comfortable fit
- Suitable for teens and adults

Based on the number of patients treated since September 2022

Your LightForce™ 3D Braces Journey: What to expect

Our Specialist Orthodontist will recommend which treatment plan is right for you - LightForce™ 3D Braces are suitable for teens and adults and a variety of problem types.

1. One Hour Consultation
Meet our clinical team and discuss your goals

2. 3D Scan and Xrays
Your treatment plan is designed by our orthodontist using a precise digital model of your teeth

3. Custom Brackets
Your braces are created and 3D printed just for you (no one else will have the same brackets for their teeth!)

4. Fewer Visits, Better Results
With Dental Monitoring, we can track your progress remotely through weekly scans, and you can see your smile transform!

5. Celebrate Your Smile
Finish with after care retainers to maintain your results and take home whitening!

We supply you with spare brackets and an oral hygiene kit.

"Digital orthodontics is transforming the way we practice. With tools like LightForce™ braces and Dental Monitoring, we can customise treatment to an unprecedented level while keeping a close eye on patients' progress in real time. It means fewer visits for patients, but more precision from us as clinicians."
Dr Sarah Lawrence, Specialist Orthodontist

Dental Monitoring

Looking for less appointments?

We understand life is busy, that is why as part of your treatment with L&L Orthodontics, we give you access to an AI powered smartphone app called Dental Monitoring, which allows our clinical team to remotely monitor your orthodontic treatment.

The app notifies you to submit weekly scans of your teeth through the app, which can be done from anywhere - home or away, all you need is wi-fi.

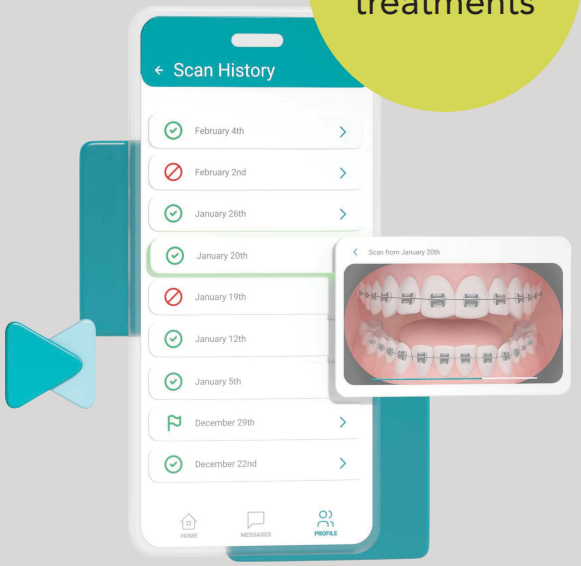

Our clinical team will review your photos and make sure your treatment is on track.

We will only need to see you at our practice if we need to adjust your treatment plan and at certain key points during treatment.

This means less time out of school or work for you!

Dental Monitoring App to help keep you on track

Included in all treatments

- See your smile transform over time through photos and video!
- Stay connected with our clinical team - just message on the app
- Ultimate treatment flexibility
- Less need to come into the practice
- Scans can be taken from anywhere - you just need wi-fi

Lennox's LightForce™ 3D Braces Journey

Lennox Lee is a young Melbourne actor who has featured in television, film, and music videos, with leading and supporting roles across various productions.

Always up for a challenge, Lennox embraces new opportunities both on and off the screen. He also plays tuba in a local brass band and loves to keep fit through judo.

"What I really love about LightForce™ braces is that they're designed just for me. Each bracket is custom 3D printed to fit each of my teeth."

"What surprised me most about LightForce™ braces is how little I needed to go in for appointments, and when I do, they're so quick and easy."

Lennox's family says "Dental monitoring is fantastic. It gives us confidence that if any changes are required, the L&L Orthodontics team are onto it every week, without Lennox having to go in for appointments."

"We only need to go in for an appointment when his teeth are ready, which is so much more convenient, and means faster results and less time in braces, which is ideal. We also love seeing the morph videos in the app of the changes over time – it's amazing!"

Consultation required to assess eligibility for treatment by a specialist orthodontist. Treatment times can vary.

About L&L Orthodontics

We're proud to be the first – and now the largest – practice in Australia to offer LightForce™ 3D Braces*.

Innovation is at the heart of everything we do at L&L Orthodontics. This fully custom, 3D-printed braces system is designed for a more precise and comfortable fit, tailored specifically to each patient.

We believe your treatment should fit your lifestyle, not the other way around.

Our team of specialist orthodontists will recommend the treatment that best suits you.

We also offer traditional metal braces and clear aligners for our patients.

*Based on the number of patients treated since September 2022.
